Subject: Griffiss AFB Site FT-030 draft PFC SI Report

Guys:

Sorry, more PFC stuff. Most or all of you already received and commented on a similar document for Plattsburgh AFB a month or 2 ago. Both bases did SI's (with sampling of multiple media) for their Fire Training Areas presumptively, rather than waste time waiting on the base-wide PA's. This one is for Griffiss's Fire Training Area.

I only got 2 hard copies and am putting one on Marian's chair. I will keep the other but you are welcome to grab it anytime. Just let me know.

The SI is also on the R Drive at R:\BMORSE\docs\Griffiss AFB\Griffiss PFOS-PFOA\FT-030\SI\Report\Draft\AF. All of you have access.

If you could review and provide any comments to me by Sept 10 (4 weeks), I would appreciate it.

I realize its summer, vacations, and end of year, and this is a lower priority document for both EPA and the AF than the current Plattsburgh SS-004 FS and the upcoming Griffiss revised SVI OU PRAP, so feel free to take that into consideration as applicable

If you have any questions, please let me know. Thanks a lot, sorry for this, and good luck with all your end of year stuff.

Bob
